## Sales Policy

Products are sold through authorized Mi-T-M Dealers, National Accounts and Original Equipment Manufacturers (OEM) as recognized by Mi-T-M. All new customers must complete a credit application. Mi-T-M will perform a credit check and upon approval the customer will receive an account number and a line of credit. There is a \$25 U.S. minimum parts order.

## Shipping

Orders without specific shipping instruction are shipped "best way" as determined by the Mi-T-M shipping department. Mi-T-M assumes no responsibility and makes no guarantees regarding air freight deliveries. Please allow seven working days before requesting tracking on lost or late shipments. Customers are responsible for outgoing freight on parts. This may be altered by any minimum qualifying freight programs. Our goal is to process all orders as soon as we receive them. No additional items can be added to a previously processed order. Any additional orders will be handled as new orders.

## Merchandise Return

Mi-T-M must be contacted before any product is returned. The customer will receive a Returned Goods Authorization (RGA) number prior to the item being returned. Mi-T-M reserves the right to refuse returned products. Products must be in new and resalable condition. Products must be current production components. All products must be returned freight prepaid at shippers expense. Products returned C.O.D. for any reason will be refused. Credit not to exceed original purchase price will be issued for approved returned products. Returns are subject to a 20% restocking fee.

## Submission of Claims

All damages to merchandise - either internal or external - must be reported to the carrier shipping such merchandise to permit an inspection report to be filed immediately. Claims of shortage of cartons, crates or boxes must be properly submitted to the carrier. Claims for errors or shortages of contents must be submitted to Mi-T-M within 24 hours after delivery of such merchandise.

*In a continued commitment to improve quality, Mi-T-M reserves the right to make component and design changes when necessary.*

# Quick Connect High Pressure Spray Nozzles

Quick connect nozzles allow you to easily switch tips depending on the application. Mi-T-M nozzles have unique pressure and flow settings that are optimized for each project.

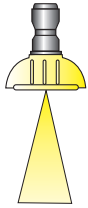

## 0° Cutting Nozzle

Provides a maximum concentrated pressure for heavy-duty cleaning that can gouge or cut into surfaces. Can remove stubborn stains on concrete and other surfaces.

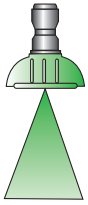

## 15° Chiseling Nozzle

Working at a 45° angle this nozzle cleans concrete and asphalt by scraping paint, grease and grime from their hard surfaces.

## 25° Flushing Nozzle

This medium spray is most commonly used to clean dirt from siding, sidewalks and hardwoods.

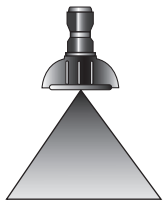

## 40° Wash Nozzle

This high-flow/low-pressure nozzle is great to clean most surfaces safely. Perfect for siding, windows and vehicles.

## Low-Pressure Detergent Nozzle

Low-pressure detergent nozzle is used to apply cleaning detergents.

## How to Use the Quick-Connect Nozzle Selection Chart

1. Determine correct orifice size for the nozzle on a pressure washer.
2. Next, use the chart below to determine the correct style, part number and price for the nozzle you need.

\*\*All part numbers beginning with AW-3018 include three (3) nozzles of the same degree.

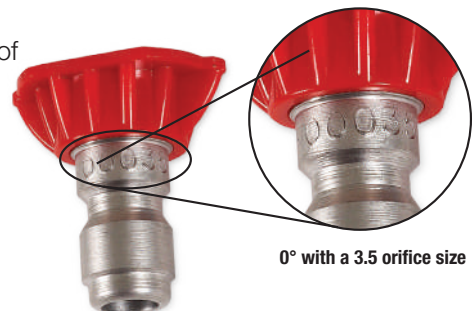

Spray nozzles are identified by the nozzle "number", a four or five digit number stamped on the nozzle indicating spray angle and orifice size. The first two digits of the nozzle number indicate the spray angle in degrees.

Example: 00 is 0°, 15 is 15°, and 40 is 40°.

The last two digits of the nozzle number indicate the orifice size, a standard industry designation.

Example: 06 is 6.0 orifice, 55 is 5.5 orifice.

These numbers correspond to actual size of the orifice. They do not, however, indicate gallons per minute, flow rates or inches in diameter of the orifice.

0° with a 3.5 orifice size

## Nozzle Volume (GPM) at Various Pressures (PSI)

A commonly used standard for nozzle size is the "nozzle number" which is equivalent to the nozzle capacity in GPM at 4000 PSI. Spray angle does not affect nozzle volume.

Nozzle Size #	Orifice (diam.)	40 PSI	100 PSI	250 PSI	500 PSI	600 PSI	700 PSI	800 PSI	1000 PSI	1250 PSI	1500 PSI	2000 PSI	2500 PSI	3000 PSI	3500 PSI	4000 PSI	5000 PSI
