

Water Conservation in our Communities

US HydroTech Environmental Solutions offers the following products and services to promote water conservation in our communities.

"Taking care of water, it's our purpose."

- ◆ **Graywater Diverter Filtration Systems** are self-contained, preferred in over 30 countries, and reduce water use by up to 50%
- ◆ **Innovative** rainwater catchment tanks which can be placed along buildings, fences, underneath decking or within walls
- ◆ **Anti-Scaling** units that eliminate chemicals and salts and reduce energy use
- ◆ **Module Water Filters** are versatile and economical for use in a home or business

Encouraging people to reduce water usage and recycle with practical technology is easier than people may think. Water conservation can provide a savings for individuals while protecting the water resources within our communities. These simple solutions can save a lot.

We do not inherit the earth from our ancestors; we borrow it from our children.
