

PARTS LIST FOR
2503/3004 SERIES
STATIONARY
ELECTRIC DRIVEN/BELT DRIVE
ELECTRIC HEATED
HOT WATER PRESSURE WASHER
HOT WATER PRESSURE WASHER

PUMP OIL GRADE:	SAE30W Non-Detergent
PUMP OIL CAPACITY:	37.2 oz.
HEAT EXCHANGE RATING:	
	2503: 48kW
	3004: 72kW
PRESSURE NOZZLE:	
	2503: 3.5
	3004: 4.5

This Parts Listing has been compiled for your benefit. You can be assured your hot water pressure washer was constructed and designed with quality and performance in mind. Each component has been rigorously tested to ensure the highest level of acceptance.

The contents of this Parts Listing are based on the latest product information available at the time of publication. The manufacturer reserves the right to make changes in price, color, materials, equipment, specifications or models at any time without notice.

WARNING

THIS IS A PROFESSIONAL HIGH PRESSURE, HOT WATER PRESSURE WASHER. CAUTION SHOULD BE OBSERVED WHEN INSTALLING, USING OR REPAIRING THIS UNIT! READ AND FOLLOW THE SAFETY WARNINGS BEFORE ATTEMPTING ANY REPAIRS ON THIS PRESSURE WASHER!

SAFETY WARNINGS

1. NEVER alter or modify the equipment. Use only genuine manufacturer parts for repair of your pressure washer. Failure to do so can cause hazardous operating conditions and will VOID warranty. Repairs performed on this pressure washer should be done by a qualified serviceman in accordance with local, state and national regulations.
2. This unit has multiple safety devices which should never be altered, modified, removed or made inoperable. If a device fails, replace immediately with only genuine manufacturer replacement parts.
3. Electrical System:
The unit must be connected to a properly grounded electrical source which provides the correct voltage and adequate fuse protection. Disconnect from power source when making repairs. Never assume the pressure washer is safe to work on just because it is not operating. It could restart at any time.
Never operate pressure washer with electrical enclosures open, removed or damaged. Do not allow metal components of the pressure washer to come in contact with live electrical components.
4. Do not operate the unit without all protective covers in place. Before servicing the unit, always shut off the unit and trigger the gun to release trapped pressure. Know how to stop the pressure washer and bleed pressures quickly. Be thoroughly familiar with controls. Be sure any accessory items and system components being used will withstand the pressure developed.

NOTES

DATE	SERIAL NUMBER	REASON FOR CHANGE
04-26-19	15131522	CHANGED REGULATING VALVE FROM 22-0501 TO 22-0507

SPECIFICATIONS

Operating Pressure (PSI/Bar):	2500/5.36	3000/6.43
High Pressure Nozzle:	3.5	4.5
Water Volume (GPM/lpm):	2.8/10.6	3.9/14.8
Motor:	TEFC	
Horsepower	6	8
Voltage	460	
RPM	1725	
Phase	3	
Amps	8	10
Pump:	Belt Driven, Oil Bath, Triplex Piston	
Oil Type	SAE30W Non-Detergent	
Oil Capacity (oz./liters)	37.2 / 1.1	
Plungers	Ceramic	
Manifold	Forged Brass	
Valves	Stainless Steel	
Unloader	Pre-set at the factory	
Thermal Relief Valve	Relieves heated water during unloader bypass stage	
Detergent Injector	Adjustable low pressure down stream from pump	
Heat Exchanger:		
Voltage	480	
Phase	3	
Amps	60	90
Rating	48kW	72kW
Electric Controls:		
Heat Exchanger	Rocker Switch	
Control Voltage	24 Volt AC	
Safety Devices:		
Thermostat	Adjustable	
Relief Valve	Relieves Excessive System Pressure	
Unit Net Weight (Lbs/kg):	624/284	725/329
Unit Shipping Weight (Lbs/kg):	725/329	826/375
Unit Net Dimension (In/cm):	39.5Lx25Wx49.25H / 100.33Lx63.45Wx125.01H	
Unit Shipping Dimension (In/cm):	57.13Lx35.75Wx51.13H / 145.11Lx90.81Wx129.87H	

FLOW CHART

GENERAL THEORY OF OPERATION

WATER FLOW: Connect a pressurized water source to the INLET GARDEN HOSE CONNECTION (2) and turn on the water supply. The water will flow through a WATER STRAINER (1) and into the TRIPLE HIGH PRESSURE PUMP (3) which has an UNLOADER (8) that bypasses the water when the trigger gun is closed. To protect the pump from heated water during this bypass stage, a HEAT DUMP VALVE (4) will open at 125°F/52°C allowing the heated water to escape. The heat dump valve automatically resets when the water cools. Attached to the pump is a PRESSURE SWITCH (7) that controls the time-delay shutdown feature.

After the high pressure water exits the pump, it enters a safety system which protects the operator from danger. The safety system contains a PRESSURE SWITCH (10) and a FLOW SWITCH (12) which must signal that water is flowing before it allows the heaters to turn on. From there, the water flows through the HEAT EXCHANGER INLET (5) where it is heated when the heat exchanger switches are on. As the water exits the HEAT EXCHANGER OUTLET (13), it passes an ADJUSTABLE THERMOSTAT (14) which senses the water temperature and shuts off the heat exchangers if the water gets too hot.

If the unloader fails to bypass water, or the heat exchanger remains on when the trigger gun is closed, the SAFETY RELIEF VALVE (11) will relieve and allow water to exit safely.

During normal operation, the trapped pressure in bypass mode may be lowered by the PRESSURE REGULATING VALVE (9), which will relieve a small amount of water into the bypass loop. This will lower the trapped pressure between the unloader and gun.

The heated water then flows through the HIGH PRESSURE HOSE (18) and to the TRIGGER GUN ASSEMBLY (19) which allows the operator to control the water supply. When the trigger gun is open, the water flows through the ADJUSTABLE PRESSURE DUAL LANCE (20) and exits the NOZZLES (21).

DETERGENT: When using detergents, the solution passes through the DETERGENT STRAINER (15) located on the DETERGENT HOSE (16). The detergent solution then travels through the DETERGENT METERING VALVE (17) and into the high pressure hose.
